Themenübersicht

FV Freie Vorträge

FV 1 Arterien

FV 1.2 Early results with the ovine collagen prosthesis (Omniflow II®) in femoropopliteal position as alternative to a synthetical vascular prosthesis

FV 1.3 Longterm-data for the treatment with cilostazol in patients suffering from Peripheral Arterial Occlusive Disease (PAOD) Fontaine Stage II (Intermittent Claudication) in Daily Practice: results of a Non-Interventional Trial (NIS) in Germany

FV 1.4 Serum Angiogenin which influences Vascular Repair is related to Macrovascular complications of Diabetes, but nor to Diabetes per se

FV 1.5 Longterm evaluation on the impact of thrombus formation on the course of abdominal aortic diameter expansion

FV 1.6 Obesity is associated with poor response to clopidogrel and an increased susceptibility to protease activated receptor-1 mediated platelet activation

FV 1.7 Preserved thrombin inducible platelet activation in thienopyridine-treated patients

FV 1.8 Prasugrel reduces agonists' inducible platelet activation and leukocyte-platelet interaction more efficiently than clopidogrel

FV 1.9 Recent Trends in Morbidity and In-hospital Outcomes of Inpatients with Peripheral Arterial Disease – a Nationwide Population-Based Analysis

FV 2 Periphere arterielle Verschlusskrankheit

FV 2.2 Small dense low-density –lipoprotein particles are associated with poor early outcome after angioplasty in peripheral artery disease

FV 2.3 Stent Placement versus Balloon Angioplasty for the Treatment of Obstructive Lesions of the Popliteal Artery: A Prospective, Multi-centre, Randomised Trial

FV 2.4 Infraopliteal arterial lesion morphology in patients with critical limb ischemia

FV 2.5 Proton pump inhibitor intake and outcome after percutaneous intervention for symptomatic iliac artery occlusive disease

FV 2.6 Percutaneous transluminal angioplasty (PTA) versus primary stenting in patients with severe claudication and critical limb ischemia with infrapopliteal vascular lesions– EXPAND study

FV 2.7 Treatment of In-Stent-Restenosis with Silverhawk Atherctomy: A Single Center Experience

FV 2.8 Care of patients with aortic abdominal aneurysmas within an interdisciplinary vascular center improves patients’ outcome and is economically effective
**FV 3 Pathophysiologie/Epidemiologie/Diagnostik**

FV 3.1 Pulse wave velocity predicts lifetime survival – a 50-year longitudinal study

FV 3.2 Outcome of Patients with reduced ankle brachial index (ABI) undergoing open heart surgery with cardiopulmonary bypass

FV 3.3 Prognostic value of neutrophils in patients with asymptomatic carotid artery disease

FV 3.4 Influence of the inflammatorical burden and plaque stability on the 11-year mortality after carotid endarterectomy

FV 3.5 Differentiation of Superficial Femoral Artery restenosis by optical coherence tomography (OCT)

FV 3.6 Assessment of disease activity in extracranial giant cell arteritis with positron emission tomography

**FV 4 VTE Venöse Thromboembolie I**

FV 4.2 Endovenous laser ablation of the great saphenous vein using the new Radial Fiber Slim – 1 month follow-up

FV 4.3 Endovenous laser ablation of varicose veins with the 1470 diode laser using a radial fibre – 1 year follow-up

FV 4.4 Lower leg perforators: Myth and reality

FV 4.5 Hemodynamic prerequisites triggering venous reflux as well as reflux recurrence

FV 4.6 Pharmacomechanical thrombectomy of pulmonary embolism - a case series

**FV 5 Arterien und kardiovaskuläres Risiko**

FV 5.2 Longterm mortality after percutaneous transluminal angioplasty in PAD patients with chronic kidney disease

FV 5.3 Cardiovascular Risk in Peripheral Arterial Disease: Evaluation of Serologic and Functional Parameters of Endothelial Function

FV 5.4 An unusual cause for the usual case of intermittent claudication

FV 5.5 Derived Neutrophil-to-Lymphocyte Ratio and its association with critical limb ischemia in PAOD patients

FV 5.6 The interdisciplinary challenge: septic wrist arthritis, acute leg ischemia and mycotic aortic aneurysm in a patient with rheumatoid arthritis and infection with pneumococci – successful infrarenal aortic replacement with superficial femoral vein

FV 5.7 Transapical endovascular aortic repair to treat complex aortic pathologies

FV 5.8 Lightweight personal protection devices for superior radiation protection in fluoroscopy-guided interventions: a prospective, randomized controlled trial
**FV 6**  **Spezielles in der Gefäßmedizin**

**FV 6.1** Sensitivity and Specificity of Fluorescence Microlymphography for Detecting Lymphedema of the lower Extremity

**FV 6.2** Wie verlässlich ist die Perometermessung bei Ödemkrankheiten?

**FV 6.3** Imaging Characterization of Central Conducting Lymphatic Anomalies

**FV 6.4** The interaction between circadian rhythms of endothelial function: resting versus recruitable endothelial function.

**FV 6.5** Gender Related Disparity in Hospitalization and In-Hospital Outcome of Patients with Peripheral Arterial Disease

**FV 6.6** Vascular Malformations in Particular Syndromes with Regional Overgrowth

**FV 7**  **Venöse Thromboembolie II**

**FV 7.2** D-Dimer levels over time and the risk of recurrent venous thromboembolism: An update of the ViennaPrediction Model

**FV 7.3** Cardiovascular risk profile of individuals with pulmonary embolism with and without history of deep vein thrombosis

**FV 7.4** D-dimer: How they can help detecting postoperative VTE in craniotomy-patients

**FV 7.5** Outpatient treatment for PE: risk factors for mortality, recurrent VTE and pulmonary hypertension at 6 month

**FV 7.6** Prevalence of Established Risk Factors for Venous Thromboembolism According to Age: Results from the MAISTHRO Registry

**FV 8**  **Endovaskuläre Therapie**

**FV 8.1** Impact of the Interventionalist on Success and Outcome of Carotid Artery Stenting in a Real Life Scenario

**FV 8.2** Retrograde recanalization technique after failed antegrade angioplasty in chronic femoral artery occlusions

**FV 8.3** RADAR – Data of a prematurely terminated randomized, multi-centre, prospective study comparing best medical treatment versus best medical treatment plus renal artery stenting in patients with hemodynamically relevant atherosclerotic renal artery stenosis

**FV 8.4** Economic Analysis of Peripheral Interventions for Femoropopliteal Arterial Disease: A Systematic Review and Budget Impact Model for the German Healthcare System

**FV 8.5** Clinical evaluation of a unique stent with 3D helical geometry – 12-month data from the Mimics Study

**FV 8.6** Evaluation of the 25 cm GORE® VIABAHN® Endoprosthesis with PROPATEN Bioactive Surface to Treat de novo and/or Restenotic Lesions of the Superficial Femoral Artery

**FV 8.7** Optic coherence tomography of tack optimized balloon angioplasty
**FV 9 Verschiedenes**

FV 9.2 Orales Rivaroxaban zur Behandlung von symptomatischen venösen Thromboembolien (VTE): Eine gepoolte Analyse der Studien EINSTEIN DVT und EINSTEIN PE

FV 9.3 Rivaroxaban bei Patienten mit symptomatischer venöser Thromboembolie und eingeschränkter Nierenfunktion

FV 9.4 Ultrasound-accelerated vs Standard Catheter-directed Thrombolysis for Treatment of Iliofemoral Deep Vein Thrombosis

FV 9.5 Inzidenz von rezidivierenden venösen Thromboembolien bei Patienten der Studien EINSTEIN DVT und EINSTEIN PE nach Studienende

FV 9.6 6 Month Outcomes for a Below the Knee use of a Novel Balloon Catheter First In Man Clinical Study

FV 9.7 Twelve-Month Results of the BIOLUX P-I First-In-Man Study Comparing a Paclitaxel-Releasing Balloon Catheter versus an Uncoated Catheter in Femoropopliteal Lesions

**FV 10 Grundlagenforschung**

FV10.1 Vaspin in patients with peripheral arterial disease

FV10.2 Injection of Vascular resident progenitor cells enhances collateral growth

FV10.3 Vascular Progenitor Cells following massive weight loss induced by Bariatric Surgery

FV10.4 Catestatin For The Treatment of Myocardial Ischemia

FV10.5 Transmembrane activation of the proteasome in vascular resident endothelial progenitor cells reduces collateral growth

FV10.6 Secretoneurin Gene Therapy Improves Hindlimb and Cardiac Ischemia in Apo E -/- Mice Without Influencing Systemic Atherosclerosis

**FV 11 Antikoagulation**

FV11.1 Management of NOAC bleeding complications - findings from the Dresden NOAC Registry

FV11.2 Peri-interventional management of NOAC patients - results from the Dresden NOAC Registry

FV11.3 Anticoagulation in a patient with hereditary hemorrhagic telangiectasia (Rendu-Osler-Weber disease), deep vein thrombosis and pulmonary embolism with new oral anticoagulants: Case report.

FV11.4 Incidence and causes of heparin-induced skin lesions in postmenopausal women

FV11.5 Recurrent cerebral ischaemia in a pregnant woman with PFO and thrombophilia under therapy with LMWH

FV11.6 Evaluation of Assay Performance Monitoring New Oral Anticoagulants
P 01 Risk factors for puncture site complications after endovascular procedures in peripheral arterial disease patients

P 02 Foreign Body Pulmonary Embolism

P 03 Endovascular therapy for a huge subclavian aneurysm in the elderly

P 04 PTA registry for diabetic foot syndrome: early quality results

P 05 PTFE Covered Stent for treatment of Isolated Brachiocephalic Trunk Stenosis: Case report

P 06 Stenting of the Popliteal artery - a single center experience with 5 year follow up

P 07 Monolateral intermittent claudication revealing renal graft ischemia

P 08 Bifurcation and Trifurcation Lesions in PAD below the knee. Successful Treatment with Rotational Atherectomy

P 09 Twelve months patency rate after percutaneous mechanical thrombectomy for treatment of acute femoropopliteal bypass occlusion in 21 patients

P 10 Adductor canal compression syndrome in a 46-year old female patient leading to acute iliac, femoral and crural artery thrombosis: a case report.

P 11 Investigation of the health care status in patients with stage III or IV according to Fontaine (critical limb ischemia) being treated with Alprostadil (Prostavasin®)

P 12 Acute wiiitis representing as thrombosis of the inferior vena cava and left pelvic veins

P 13 statin medication and incidence of recurrent deep venous thrombosis

P 14 Evaluierung von Komplikationen (Pseudoaneurysma), die in direktem oder indirekten Zusammenhang mit der Kompressionstherapie / Thrombininjektion zur Behandlung von katheterassozierten Komplikationen stehen

P 15 The complex DVT-case: Young women with extensive vein thrombosis and ulcerative colitis

P 16 Agenesis of inferior vena cava: A case report

P 17 Intraprocedural Complications for Sclerotherapy in Venous Malformations

P 18 Arteriovenous fistula after major joint surgery as a cause of massive leg swelling and development of a non-healing venous leg ulcer: a case report

P 19 How safe is the access tapping the arteria femoralis indeed?

P 20 Can the patients risk regarding the development of iatrogenic vessel complication following transdermal / percutaneous vessel intervention be individualized?
P 21 Recurrent infections with unilateral pain in the right carotid bulb as a manifestation of a local dissection?
P 22 Insights to prostanoid therapy in CLI by indocyanine fluorescent angiography
P 23 Acute effects of dark chocolate on vascular function in patients with peripheral artery disease
P 24 Contribution of non invasive diagnostic in dialysis associated steal syndrome: a case report
P 25 Microvascular reactivity as function of sex and age
P 26 Impact of cytochrome 2C9 allelic variants on clopidogrel-mediated platelet inhibition
P 27 The efficacy of antiplatelet therapy with aspirin in patients after ischemic stroke
P 28 Indirect local fibrinolysis as therapy for subacute digital ischemia
P 29 Niacin and Nicotinamide’s effect on the reversion of the migratory arrest of macrophages mediated by oxLDL
P 30 Blue toe syndrome - A description of positive evolutions through patient adapted therapy
P 31 Tinnitus and hypercoagulable state
P 32 Use of radial approach for stenting of left carotid artery stenosis in patients with bovine aortic arch: case report
P 33 Ambulatory Negative Pressure Wound Therapy with a miniaturized sytem shortens in-hospital stay
P 34 From Ollier to Maffucci
P 35 Aortic Aneurysm im Giant Cell Arteritis
P 36 Functional stenosis of the right iliac artery in a young healthy road cyclist
P 37 Accidental injection of epinephrine in the thumb
P 38 Hämostaseologische Komorbiditäten bei Patienten einer lymphologischen Fachklinik
P 39 Endovenous laser ablation of the small saphenous vein using the new Radial Fiber Slim– 1 month follow-up
P 40 AGXT2 plays important role in regulation of urine ADMA levels after acute ADMA loading in mice
PP Poster-Präsentationen

PP 1 Pathophysiologie/Epidemiologie

PP 1.1 Association between multiple biomarkers and classical risk factors with early carotid atherosclerosis – Results from the Gutenberg Health Study

PP 1.2 The influence of CKD on the morbidity, outcomes and healthcare costs of Patients with Peripheral Arterial Disease in Germany from 2005 to 2009

PP 1.3 Fibromuscular Dysplasia of the superior mesenteric artery - a rare cause of Angina abdominalis

PP 1.4 The impact of red cell distribution width on outcome in patients with atherosclerosis

PP 1.5 Phosphorus-rich diet specifically induces media calcification in the abdominal aorta

PP 2 Endovaskuläre Therapie

PP 2.1 PEACE registry: Patency evaluation after implantation of the Pulsar-18 self-expanding nitinol stent in the superficial femoral and popliteal arteries of the first 101 of 200 patients

PP 2.2 Wall shear stress in the stented superficial femoral artery in patients with peripheral arterial disease

PP 2.3 Short term Effectiveness of Paclitaxel-Eluting stents in femoropopliteal lesions

PP 2.4 Two years follow-up after endovascular repair of a symptomatic aneurysm of the posterior circumflex humeral artery

PP 2.5 Short- and longterm success of thrombin occluded aneurysm spuria in 632 patients; complications and mortality

PP 3 Arterien

PP 3.1 Standard Radial approach for coronary catheterization and access site complications - an observational registry

PP 3.2 Monocyte Vaccination for Therapeutic Collateralization

PP 3.3 Superficial femoral artery TASC D Registry: Twelve-month effectiveness analysis of the Pulsar-18 SE nitinol stent in patients with critical limb ischemia

PP 3.4 A case of successful critical limb ischaemia treatment by pharmacomechanical thrombectomy

PP 3.5 The preinterventional Cystatin-Creatinine-ratio: a prognostic marker for contrast medium-induced acute kidney injury and long-term all-cause mortality
**PP 4  Venen**

**PP 4.1** Asymptomatic and symptomatic pulmonary embolism in oncological and non oncological patients. Findings from the RIETE Registry

**PP 4.2** Infections and venous thromboembolism. Data from the RIETE Registry.

**PP 4.3** Soluble P-selectin, D-dimer and high-sensitivity C-reactive protein after acute deep vein thrombosis of the lower limb

**PP 4.4** D-Dimer for risk stratification in hemodynamic stable patients with acute pulmonary embolism

**PP 4.5** Ethiodol in Sclerotherapy of Venous Malformations

**PP 5  Blutgerinnung**

**PP 5.1** Frequent off-label use of fondaparinux in patients with suspected acute heparin-induced thrombocytopenia (HIT) - results from the GerHIT multi-centre registry study

**PP 5.2** Nucleoside triphosphates inhibit ADP, collagen, and epinephrine-induced platelet aggregation: Role of P2RY1 and P2RY12

**PP 5.3** Essential thrombocythemia and abdominal angina

**PP 5.4** Management of life-threatening gastrointestinal bleeding due to dabigatran accumulation in a 79-years-old woman with renal insufficiency, atrial fibrillation and multiple myeloma

**PP 5.5** Scurvy, sailor’s disease onshore

**PP 6  Diagnostik und Pharmakotherapie**

**PP 6.1** Post-Interventional Evaluation of Stent-Perfusion with Vascular Ultrasonography

**PP 6.2** Late structural damage of the thoracic aorta in patients with giant cell arteritis: Preliminary results of a magnetic resonance imaging study

**PP 6.3** Pictorial Review of Fibro-Adipose Vascular Anomaly (FAVA)

**PP 6.4** Use of fondaparinux in suspected acute heparin-induced thrombocytopenia (HIT) - final results from the GerHIT multicentre registry study

**PP 6.5** Impact of clopidogrel resistance on Patients with peripheral vascular disease undergoing peripheral angioplasty: Is it necessary to consider genotyping patients prior to angioplasty and prescribing clopidogrel?
Sektionssitzung
Diabetes und Wundheilung

S 1 Endogenous but especially exogenous Insulin influences Matrix-Metalloproteinases. Could this reflect a potential proatherogenic risk of Insulin Supplementation Therapy?

S 2 Response to antiplatelet therapy and platelet reactivity to thrombin receptor activating peptide-6 in cardiovascular interventions: differences between peripheral and coronary angioplasty

S 3 Clinically driven need for secondary interventions after endovascular revascularization of tibial arteries in patients with critical limb ischemia

YIA Preisträgersitzung

YIA.1 Early recoil after plain balloon angioplasty of tibial arterial obstructions in patients with critical limb ischemia

YIA.2 Lymphocyte-to-Monocyte Ratio: A novel marker for critical limb ischemia in PAOD Patients

YIA.3 Correlation between intima-media thickness (IMT) and flow-mediated dilation (FMD)

YIA.4 Gene therapy in peripheral arterial disease: a systematic review and meta-analysis of randomized, controlled trials

YIA.5 Peripheral Arterial Disease Increases In-hospital Mortality in Patients with Acute Myocardial Infarction - a Nationwide Population-based Analysis
