

ESM 14. Supplementary Fig. 3a. Forest plot of hazard ratios of dabigatran versus VKAs for intracranial bleeding. If a specific subgroup was analyzed this is indicated after the indicator 'D' in the right column, a number after D refers to the dose in mg twice per day. The meta-analytical DerSimonian-Laird random effect estimate is indicated as a diamond in the last line and by the dashed line. Overall heterogeneity test with I-squared and p-value is shown in the last line on the left side.
