ESM 4. AscAA growth rates overall and stratified for initial diameter

initial aortic diameter	annual aneurysm growth rate (mm/y: mean±SD)			
	study cohort		patient cohort with >1mm/y growth rate	
<40mm	1.28±0.74	3	2.13	1
40-44mm	0.14±0.60	51	1.45±0.36	4
45-49mm	0.17±0.58	61	1.73±0.63	3
50-54mm	0.18±0.77	30	1.69±0.11	4
Overall	0.18±0.64	(n=145)	1.66±0.39	(n=12)

The individual growth rates for the cohort presented in the study are given stratified for the initial diameter. Abbreviations: n = number of patients; SD = standard deviation.
