ESM 5. Responses to the outcome corona symptom severity in subsample of people with a corona infection (n=872)

“The main symptoms of the corona virus are, for example, fever over 38 degrees; a new, persistent cough or a cold; head and limb pain; or disturbed smell and taste. When you think about it, how severe were the symptoms of your corona disease?”	N (%)
1. I had no symptoms or the test result was probably wrong	148 (17.0)
2. I only had mild symptoms	462 (53.0)
3. I had severe symptoms, but could cure myself at home	233 (26.7)
4. I had severe symptoms and had to get treatment in a hospital	19 (2.2)
5. In the hospital I needed intensive care treatment or had to be intubated	6 (0.7)
6. No response	4 (0.5)

Notes. Responses 1-2 indicating low symptom severity and 3-5 high symptom severity.
