Table E1: Examples of multi-level interventions (implementation strategies and research approaches)

	OSPI	SPIRIT	Qungasvik	Commonalities
Location	Ireland, Portugal, Hungary, Germany	Gujarat, India	Alaska, United States of America	<ul style="list-style-type: none"> • Community-based • Intersectoral collaborations • Engagement of multiple key actors and stakeholders • Adaptation of interventions to local context/community settings • Synergies within interventions
Target group(s)	All age groups, different sub-populations	All age groups, different sub-populations	All age groups with a specific focus on the youth	
Number of levels/components	4	3	36 intervention modules aimed at community, family, and individual levels	
Interventions/levels	<ul style="list-style-type: none"> • Training and support in general practice • General public awareness campaign • Training of gatekeepers in the community • Improvement in care for high-risk groups • Restriction of access to lethal means 	<ul style="list-style-type: none"> • The Youth Aware of Mental Health – school-based program for adolescents • A community storage facility for pesticides • Training of community health workers in early identification 	<p>Community level: For example - Using ‘Qasgiq’ (Men’s house) a sacred communal setting to hold discussions around the way of life or ‘how to live’</p> <p>Family level: For example – Yup’ik kinship terms – constructing the family genogram to identify resource people and role models.</p> <p>Individual level: For example – ‘Surviving your feelings’ – creating settings where youth can openly discuss their feelings about taboo topics such as suicide.</p>	
Examples of key implementation strategies	Evaluative and iterative strategies: <ul style="list-style-type: none"> • Capture and share local knowledge 	Evaluative and iterative strategies: <ul style="list-style-type: none"> • Capture and share local knowledge 	Evaluative and iterative strategies: <ul style="list-style-type: none"> • Capture and share local knowledge 	

<p>(Powell et al., 2015; Kirchner et al., 2017)</p>	<p>Develop stakeholder interrelationships:</p> <ul style="list-style-type: none"> • Use advisory boards and workgroups • Build a coalition <p>Train and educate stakeholders:</p> <ul style="list-style-type: none"> • Conduct ongoing training • Use train-the-trainer strategies 	<ul style="list-style-type: none"> • Conduct local needs assessment • Develop a formal implementation blueprint <p>Adapt and tailor to context:</p> <ul style="list-style-type: none"> • Promote adaptability <p>Develop stakeholder interrelationships:</p> <ul style="list-style-type: none"> • Mandate change • Build a coalition 	<ul style="list-style-type: none"> • Conduct local consensus discussions <p>Develop stakeholder interrelationships:</p> <ul style="list-style-type: none"> • Create a learning collaborative • Use advisory boards and workgroups 	
<p>Research Design / Approach</p>	<p>Prospective controlled intervention effectiveness study (including a process evaluation)</p> <p>Hybrid Design Type 1</p>	<p>Cluster randomised intervention trial (including a process evaluation)</p> <p>Hybrid Design Type 1</p>	<p>Participatory research (to inform program development and implementation)</p>
